

## Marko Pogačnik

### THE HUMAN BODY AND THE BODY OF THE EARTH

Gaia-touch workshop in Solheimar-community, Iceland

June 23–25, 2015

We are witnessing a time of great changes in the body of the Earth and the human body. Iceland is a place that is connected directly to the core of Gaia, the Earth soul. It is a place where the dialogue with the Earth as consciousness can be experienced and should be developed. Iceland is of crucial importance for the Earth's stability in the time of change.

The author has developed different methods to perceive the subtle dimensions of the landscape and its elemental/fairy beings. Some of them are based upon body movements called "Gaia Touch". Others can be used as support in the personal development. Part of the workshop is to come in touch with the given environment, to get to know its function in the greater hole and see if it does need some work of environmental healing.

Marko Pogačnik (1944) lives in Slovenia. During the years 1965-71 he worked in Conceptual Art and Land Art as member of OHO group. After 1971 he works in the field of art combined with integral ecology (geomancy).

Marko has developed a method of Earth healing called "lithopuncture" (Earth acupuncture) complemented with the "language of cosmograms", creating lithopuncture works worldwide. His books in English include: *Touching the Breath of Gaia; Turned Upside Down; Nature Spirits & Elemental Beings; Gaia's Quantum Leap; Sacred Geography*.

The workshop will take place in Solheimar-community in Iceland. Solheimar is an intentional community whereabout 100 people, some with disabilities, live and work together. Solheimar-residents focus on ecological and sustainable living, organic farming and production of eco-friendly art.

**Address:** Solheimar, Grimsnes, 801, Iceland.

**Accommodation:**

Single room in Solheimar-guesthouse: **47 €** per night

**Workshop contribution: 160 €**

**Workshop registration:**
