

Marko Pogacnik

OSLO FJORDEN

WORKSHOP

10 – 12 of August

Lecture in Oslo 9 of Aug

The year 2012 is a symbol of great change in space and time. On one side there are dramatic events shocking the society as well as the biosphere of the planet. Yet there are also fantastic possibilities of peace and beauty kept safe in the seeds of the future. Where are the seeds of future in the area of the upper Oslo Fjorden? How can the new structure of space and time be experienced in the given landscape? Which are traumas in the given landscape that prevent the new to flourish? The workshop can not give definite answers but can offer possibilities of being involved in the enfoldment of the future.

Lecture: How to protect the matrix of life?

Beyond the densely materialized world structure there pulsates the etheric reality, organized through the matrix of life. In the era when human beings are losing last contacts to the essence of reality, how can we prevent the life organism to evaporate? The author shares his experiences of the self-healing process that Gaia, the Earth consciousness has introduced to avoid the break-down of its life systems.
